SingTone Technologies is a certified Veteran-Owned Small Business based out of Dayton, OH. We are Consulting Firm with over 40 years of expertise in Information Technology (IT) Solutions: Custom Application Development and Support; Data Processing and Hosting; Business Process Improvement; Configuration Management; Independent Testing; and Project Management. Our staff supports Commercial businesses, Federal Agencies, and the Health Care Industry. Through the use of current technology, we create web-based solutions to improve processes and applications to reduce overhead costs. We aim to build long-term relationships, uphold the highest standard of integrity, and aim to exceed standards.

Core Competencies

Project Management:

SingTone Technologies provide professionals with experience in project cost control, budgeting, procurement, and logistics. Our core competency is understanding our client's project requirements and implementing a tailored solution to oversee performance to ensure a on time, on budget delivery.

Business Process Improvement:

In today's economic stature, the increasing demand to do more with less is growing; and, weak business processes waste time and money and almost always have a negative impact on the end-product or service quality. SingTone Technologies streamlines processes to increase return on investments, reduce overhead costs, and increase efficiency.

Configuration Management:

SingTone Technologies uses Software Configuration Management (SCM) processes to ensure the success of each project by maintaining, controlling, documenting, tracking, and reporting software application and operational environment changes to guard against third party threats, and to preserve document baselines.

Networking and Hosting Services:

SingTone Technologies offers world class quality hosting services. Our hosting packages are known for their speed, security, and reliability – suitable for personal and small to medium businesses looking to share files for collaborative sites (i.e.: SharePoint), have a corporate email account, and be hosted.

Independent Verification and Validation and Quality Assurance:

SingTone Technologies is a technology company with an outstanding software development framework. With more than 50 years of combined experience in testing software we work with Confirmation Management teams to enforce Systems Engineering Processes.

Custom Web Application Development and Support:

SingTone Technologies build customized web-based and desktop Applications to streamline processes and reduce overhead expenses. Our solutions automate reporting processes using Excel, Crystal Reports, Business Objects, or other business intelligence applications.

Technical Expertise
